GET3 (NM_004317) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human arsA arsenite transporter, ATP-binding, homolog 1 (bacterial)

(ASNA1), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC201194 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDK**V**

Tag: C-Myc/DDK

Predicted MW: 38.6 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 004308

Locus ID: 439

UniProt ID: <u>O43681</u>

RefSeq Size: 1298

Cytogenetics: 19p13.13 RefSeq ORF: 1044

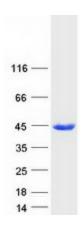

Synonyms: ARSA-I; ARSA1; ASNA-I; ASNA1; TRC40

Summary: This gene represents the human homolog of the bacterial arsA gene, encoding the arsenite-

stimulated ATPase component of the arsenite transporter responsible for resistance to arsenicals. This protein is also a central component of a transmembrane domain (TMD) recognition complex (TRC) that is involved in the post-translational delivery of tail-anchored (TA) proteins from the cytosol to the endoplasmic reticulum (ER). It recognizes and selectively binds the TMD of TA proteins in the cytosol, and delivers them to the ER for insertion.
