## ARF1 (NM\_001024227) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins** Recombinant protein of human ADP-ribosylation factor 1 (ARF1), transcript variant 1, 1 mg **Description:** Species: Human HEK293T **Expression Host:** Expression cDNA Clone >RC201240 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s) MGNIFANLFKGLFGKKEMRILMVGLDAAGKTTILYKLKLGEIVTTIPTIGFNVETVEYKNISFTVWDVGG QDKIRPLWRHYFQNTQGLIFVVDSNDRERVNEAREELMRMLAEDELRDAVLLVFANKQDLPNAMNAAEIT DKLGLHSLRHRNWYIQATCATSGDGLYEGLDWLSNQLRNQK TRTRPLEQKLISEEDLAANDILDYKDDDDKV C-Myc/DDK Tag: Predicted MW: 20.5 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol Recombinant protein was captured through anti-DDK affinity column followed by Preparation: conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Storage: Store at -80°C. Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles. NP 001019398 **RefSeq:** 375 Locus ID: **UniProt ID:** P84077, A0A024R3Q0 2020 **RefSeq Size:**

| Summary:      | ADP-ribosylation factor 1 (ARF1) is a member of the human ARF gene family. The family<br>members encode small guanine nucleotide-binding proteins that stimulate the ADP-<br>ribosyltransferase activity of cholera toxin and play a role in vesicular trafficking as activators<br>of phospholipase D. The gene products, including 6 ARF proteins and 11 ARF-like proteins,<br>constitute a family of the RAS superfamily. The ARF proteins are categorized as class I (ARF1,<br>ARF2 and ARF3), class II (ARF4 and ARF5) and class III (ARF6), and members of each class share<br>a common gene organization. The ARF1 protein is localized to the Golgi apparatus and has a<br>central role in intra-Golgi transport. Multiple alternatively spliced transcript variants encoding<br>the same protein have been found for this gene. [provided by RefSeq, Jul 2008] |

**Protein Pathways:** 

Vibrio cholerae infection

### **Product images:**

Coomassie blue staining of purified ARF1 protein (Cat# [TP301240]). The protein was produced from HEK293T cells transfected with ARF1 cDNA clone (Cat# [RC201240]) using MegaTran 2.0 (Cat# [TT210002]).
