VPS29 (NM 057180) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human vacuolar protein sorting 29 homolog (S. cerevisiae) (VPS29),

transcript variant 2, 100 µg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC201

Expression cDNA Clone >RC201460 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

GAYNALETNIIPSFVLMDIQASTVVTYVYQLIGDDVKVERIEYKKP

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 20.7 kDa

Concentration: $>0.05 \mu g/\mu L$ as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 476528

Locus ID: 51699

UniProt ID: Q9UBQ0, A0A384MR19

RefSeq Size: 1153

Cytogenetics: 12q24.11

RefSeq ORF: 558

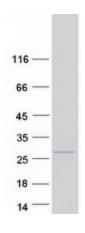

Synonyms: DC7; DC15; PEP11

Summary: This gene belongs to a group of vacuolar protein sorting (VPS) genes that, when functionally

impaired, disrupt the efficient delivery of vacuolar hydrolases. The protein encoded by this gene is a component of a large multimeric complex, termed the retromer complex, which is involved in retrograde transport of proteins from endosomes to the trans-Golgi network. This VPS protein may be involved in the formation of the inner shell of the retromer coat for retrograde vesicles leaving the prevacuolar compartment. Alternative splice variants encoding different isoforms and representing non-protein coding transcripts have been found for this

gene. [provided by RefSeq, Aug 2013]

Product images:

Coomassie blue staining of purified VPS29 protein (Cat# [TP301460]). The protein was produced from HEK293T cells transfected with VPS29 cDNA clone (Cat# [RC201460]) using MegaTran 2.0 (Cat# [TT210002]).
