## Product datasheet for TP301839

## PIG3 (TP53I3) (NM\_004881) Human Recombinant Protein

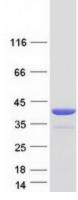

## **Product data:**

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human tumor protein p53 inducible protein 3 (TP53I3), transcript variant 1, 20 μg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC201839 protein sequence Red=Cloning site Green=Tags(s)

	PIG3 (TP53I3) (NM_004881) Human Recombinant Protein – TP301839
RefSeq:	<u>NP 004872</u>
Locus ID:	9540
UniProt ID:	<u>Q53FA7</u>
RefSeq Size:	2042
Cytogenetics:	2p23.3
RefSeq ORF:	996
Synonyms:	PIG3
Summary:	The protein encoded by this gene is similar to oxidoreductases, which are enzymes involved in cellular responses to oxidative stresses and irradiation. This gene is induced by the tumor suppressor p53 and is thought to be involved in p53-mediated cell death. It contains a p53 consensus binding site in its promoter region and a downstream pentanucleotide microsatellite sequence. P53 has been shown to transcriptionally activate this gene by interacting with the downstream pentanucleotide microsatellite sequence. The microsatellite is polymorphic, with a varying number of pentanucleotide repeats directly correlated with the extent of transcriptional activation by p53. It has been suggested that the microsatellite polymorphism may be associated with differential susceptibility to cancer. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, May 2011]
Protein Families:	Druggable Genome
Protein Pathways	p53 signaling pathway
Product image	es:

Coomassie blue staining of purified TP53I3 protein (Cat# TP301839). The protein was produced from HEK293T cells transfected with TP53I3 cDNA clone (Cat# [RC201839]) using MegaTran 2.0 (Cat# [TT210002]).
