TSPAN6 (NM 003270) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human tetraspanin 6 (TSPAN6), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC202014 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

VVAGISFGVACFQLIGIFLAYCLSRAITNNQYEIV

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 27.4 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 003261

Locus ID: 7105

UniProt ID: 043657

TSPAN6 (NM_003270) Human Recombinant Protein - TP302014M

RefSeq Size: 3833

Cytogenetics: Xq22.1 RefSeq ORF: 735

Synonyms: T245; TM4SF6; TSPAN-6

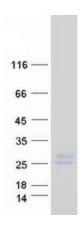

Summary: The protein encoded by this gene is a member of the transmembrane 4 superfamily, also

known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The protein encoded by this gene is a cell surface glycoprotein and is highly similar in sequence to the transmembrane 4 superfamily member 2 protein. It functions as a negative regulator of retinoic acid-inducible gene I-like receptor-mediated immune signaling via its interaction with the mitochondrial antiviral signaling-centered signalosome. This gene uses alternative polyadenylation sites, and multiple transcript variants result from alternative

splicing. [provided by RefSeq, Jul 2013]

Protein Families: Transmembrane

Product images:

Coomassie blue staining of purified TSPAN6 protein (Cat# [TP302014]). The protein was produced from HEK293T cells transfected with TSPAN6 cDNA clone (Cat# [RC202014]) using MegaTran 2.0 (Cat# [TT210002]).
