Summary: The protein encoded by this gene is a retinoblastoma binding protein that may play a role in

the regulation of cell proliferation and differentiation. Two alternatively spliced transcript variants of this gene with identical predicted protein products have been reported, one of

which is a nonsense-mediated decay candidate. [provided by RefSeq, Jul 2008]

Coomassie blue staining of purified RBBP9 protein (Cat# [TP302090]). The protein was produced from HEK293T cells transfected with RBBP9 cDNA clone (Cat# [RC202090]) using MegaTran 2.0 (Cat# [TT210002]).
