Ribonuclease Inhibitor (RNH1) (NM 203384) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Recombinant protein of human ribonuclease/angiogenin inhibitor 1 (RNH1), transcript variant Description:

3, 100 µg

Species: Human **Expression Host:** HEK293T

Expression cDNA Clone >RC202451 protein sequence or AA Sequence:

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 49.8 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Recombinant protein was captured through anti-DDK affinity column followed by Preparation:

conventional chromatography steps.

For testing in cell culture applications, please filter before use. Note that you may experience Note:

some loss of protein during the filtration process.

Store at -80°C. Storage:

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 976318

Locus ID: 6050

UniProt ID: <u>P13489</u>, <u>A0A140V|T8</u>

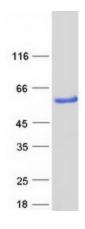

RefSeq Size: 1816 Cytogenetics: 11p15.5 RefSeq ORF: 1383

Synonyms: RAI; RNH

Summary: Placental ribonuclease inhibitor (PRI) is a member of a family of proteinaceous cytoplasmic

RNase inhibitors that occur in many tissues and bind to both intracellular and extracellular RNases (summarized by Lee et al., 1988 [PubMed 3219362]). In addition to control of intracellular RNases, the inhibitor may have a role in the regulation of angiogenin (MIM 105850). Ribonuclease inhibitor, of 50,000 Da, binds to ribonucleases and holds them in a latent form. Since neutral and alkaline ribonucleases probably play a critical role in the turnover of RNA in eukaryotic cells, RNH may be essential for control of mRNA turnover; the interaction of eukaryotic cells with ribonuclease may be reversible in vivo.[supplied by OMIM,

Coomassie blue staining of purified RNH1 protein (Cat# [TP302451]). The protein was produced from HEK293T cells transfected with RNH1 cDNA clone (Cat# [RC202451]) using MegaTran 2.0 (Cat# [TT210002]).
