### Kallikrein 2 (KLK2) (NM\_005551) Human Recombinant Protein

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant protein of human kallikrein-related peptidase 2 (KLK2), transcript variant 1, 20

με

Species: Human
Expression Host: HEK293T

**Expression cDNA Clone** >RC202667 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

GDSGGPLVCNGVLQGITSWGPEPCALPEKPAVYTKVVHYRKWIKDTIAANP

**TRTRPLEQKLISEEDLAANDILDYKDDDDKV** 

Tag: C-Myc/DDK

Predicted MW: 28.5 kDa

Concentration:  $>0.05 \mu g/\mu L$  as determined by microplate BCA method

**Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

**Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

**Note:** For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

**Storage:** Store at -80°C.

**Stability:** Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 005542

**Locus ID:** 3817

#### Kallikrein 2 (KLK2) (NM\_005551) Human Recombinant Protein - TP302667

UniProt ID: P20151

RefSeq Size: 2855

Cytogenetics: 19q13.33

RefSeq ORF: 783

**Synonyms:** hGK-1; hK2; KLK2A2

**Summary:** This gene encodes a member of the grandular kallikrein protein family. Kallikreins are a

subgroup of serine proteases that are clustered on chromosome 19. Members of this family are involved in a diverse array of biological functions. The protein encoded by this gene is a highly active trypsin-like serine protease that selectively cleaves at arginine residues. This protein is primarily expressed in prostatic tissue and is responsible for cleaving pro-prostate-specific antigen into its enzymatically active form. This gene is highly expressed in prostate tumor cells and may be a prognostic maker for prostate cancer risk. Alternate splicing results

in both coding and non-coding transcript variants. [provided by RefSeq, Jan 2012]

**Protein Families:** Druggable Genome, Protease

# **Product images:**

Coomassie blue staining of purified KLK2 protein (Cat# TP302667). The protein was produced from HEK293T cells transfected with KLK2 cDNA clone (Cat# [RC202667]) using MegaTran 2.0 (Cat# [TT210002]).
