# Product datasheet for TP302917

## Pet1 (FEV) (NM\_017521) Human Recombinant Protein

### **Product data:**

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human FEV (ETS oncogene family) (FEV), 20 $\mu g$
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	Recombinant protein was produced with TrueORF clone, RC202917.
Tag:	C-Myc/DDK
Predicted MW:	24.8 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol
Preparation:	Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<u>NP 059991</u>
Locus ID:	54738
UniProt ID:	<u>Q99581</u>
RefSeq Size:	1901
Cytogenetics:	2q35
RefSeq ORF:	714
Synonyms:	HSRNAFEV; PET-1

# Pet1 (FEV) (NM\_017521) Human Recombinant Protein - TP302917Summary:This gene belongs to the ETS transcription factor family. ETS family members have a highly<br/>conserved 85-amino acid ETS domain that binds purine-rich DNA sequences. The alanine-rich<br/>C-terminus of this gene indicates that it may act as a transcription repressor. This gene is<br/>exclusively expressed in neurons of the central serotonin (5-HT) system, a system implicated<br/>in the pathogeny of such psychiatric diseases as depression, anxiety, and eating disorders. In<br/>some types of Ewing tumors, this gene is fused to the Ewing sarcoma (EWS) gene following<br/>chromosome translocations. [provided by RefSeq, Jul 2008]

Protein Families: Druggable Genome, Transcription Factors

### **Product images:**

Coomassie blue staining of purified FEV protein (Cat# TP302917). The protein was produced from HEK293T cells transfected with FEV cDNA clone (Cat# [RC202917]) using MegaTran 2.0 (Cat# [TT210002]).
