CAPNS1 (NM_001003962) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human calpain, small subunit 1 (CAPNS1), transcript variant 2, 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA >RC203233 representing NM_001003962

Clone or AA Sequence:

Red=Cloning site Green=Tags(s)

NMIIRRYSDESGNMDFDNFISCLVRLDAMFRAFKSLDKDGTGQIQVNIQEWLQLTMYS

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 28.1 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional

chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience some

loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling

conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 001003962

Locus ID: 826

UniProt ID: P04632

CAPNS1 (NM_001003962) Human Recombinant Protein - TP303233L

RefSeq Size: 1489

Cytogenetics: 19q13.12

RefSeq ORF: 804

Synonyms: CALPAIN4; CANP; CANPS; CAPN4; CDPS; CSS1

Summary: This gene is a member of the calpain small subunit family. Calpains are calcium-dependent

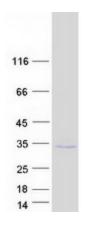

cysteine proteinases that are widely distributed in mammalian cells. Calpains operate as heterodimers, comprising a specific large catalytic subunit (calpain 1 subunit in Calpain I, and calpain 2 subunit in Calpain II), and a common small regulatory subunit encoded by this gene. This encoded protein is essential for the stability and function of both calpain heterodimers, whose proteolytic activities influence various cellular functions including apoptosis, proliferation, migration, adhesion, and autophagy. Calpains have been implicated in neurodegenerative processes, such as myotonic dystrophy. A pseudogene of this gene has been defined on

chromosome 1. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Oct

2014]

Protein Families: Druggable Genome, Protease

Product images:

Coomassie blue staining of purified CAPNS1 protein (Cat# [TP303233]). The protein was produced from HEK293T cells transfected with CAPNS1 cDNA clone (Cat# [RC203233]) using MegaTran 2.0 (Cat# [TT210002]).
