Calprotectin (S100A8) (NM_002964) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Homo sapiens S100 calcium binding protein A8 (S100A8), 1

mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC203255 representing NM_002964

or AA Sequence: Red=Cloning site Green=Tags(s)

MLTELEKALNSIIDVYHKYSLIKGNFHAVYRDDLKKLLETECPQYIRKKGADVWFKELDINTDGAVNFQE

FLILVIKMGVAAHKKSHEESHKE

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 10.7 kDa

Concentration: $>0.05 \mu g/\mu L$ as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 002955

 Locus ID:
 6279

 UniProt ID:
 P05109

RefSeq Size: 532

Calprotectin (S100A8) (NM_002964) Human Recombinant Protein - TP303255L

Cytogenetics: 1q21.3

RefSeq ORF: 279

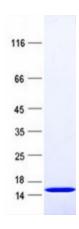

Synonyms: 60B8AG; CAGA; CFAG; CGLA; CP-10; L1Ag; MA387; MIF; MRP8; NIF; P8

Summary: The protein encoded by this gene is a member of the S100 family of proteins containing 2 EF-

hand calcium-binding motifs. S100 proteins are localized in the cytoplasm and/or nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. S100 genes include at least 13 members which are located as a cluster on chromosome 1q21. This protein may function in the inhibition of casein kinase and as a cytokine. Altered expression of this protein is associated with the disease cystic fibrosis. Multiple transcript variants encoding different isoforms have been

found for this gene. [provided by RefSeq, Jan 2016]

Product images:

Coomassie blue staining of purified S100A8 protein (Cat# [TP303255]). The protein was produced from HEK293T cells transfected with S100A8 cDNA clone (Cat# [RC203255]) using MegaTran 2.0 (Cat# [TT210002]).
