Product datasheet for TP303272L

PEN2 (PSENEN) (NM_172341) Human Recombinant Protein

Product data:

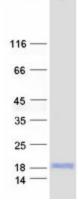

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human presenilin enhancer 2 homolog (C. elegans) (PSENEN), 1 mg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC203272 protein sequence Red=Cloning site Green=Tags(s)
	MNLERVSNEEKLNLCRKYYLGGFAFLPFLWLVNIFWFFREAFLVPAYTEQSQIKGYVWRSAVGFLFWVIV LTSWITIFQIYRPRWGALGDYLSFTIPLGTP
	TRTRPLEQKLISEEDLAANDILDYKDDDDKV
Tag:	C-Myc/DDK
Predicted MW:	11.8 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol
Preparation:	Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<u>NP 758844</u>
Locus ID:	55851
UniProt ID:	<u>Q9NZ42</u>
RefSeq Size:	834
Cytogenetics:	19q13.12

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	PEN2 (PSENEN) (NM_172341) Human Recombinant Protein – TP303272L
RefSeq ORF:	303
Synonyms:	ACNINV2; MDS033; MSTP064; PEN-2; PEN2
Summary:	Presenilins, which are components of the gamma-secretase protein complex, are required for intramembranous processing of some type I transmembrane proteins, such as the Notch proteins and the beta-amyloid precursor protein. Signaling by Notch receptors mediates a wide range of developmental cell fates. Processing of the beta-amyloid precursor protein generates neurotoxic amyloid beta peptides, the major component of senile plaques associated with Alzheimer's disease. This gene encodes a protein that is required for Notch pathway signaling, and for the activity and accumulation of gamma-secretase. Mutations resulting in haploinsufficiency for this gene cause familial acne inversa-2 (ACNINV2). Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]
Protein Families:	Druggable Genome, Transmembrane
Protein Pathway	s: Alzheimer's disease, Notch signaling pathway

Product images:

Coomassie blue staining of purified PSENEN protein (Cat# [TP303272]). The protein was produced from HEK293T cells transfected with PSENEN cDNA clone (Cat# [RC203272]) using MegaTran 2.0 (Cat# [TT210002]).
