	CHODL (NM_024944) Human Recombinant Protein – TP303392
RefSeq Size:	2625
Cytogenetics:	21q21.1
RefSeq ORF:	819
Synonyms:	C21orf68; MT75; PRED12
Summary:	This gene encodes a type I membrane protein with a carbohydrate recognition domain characteristic of C-type lectins in its extracellular portion. In other proteins, this domain is involved in endocytosis of glycoproteins and exogenous sugar-bearing pathogens. This protein localizes predominantly to the perinuclear region. Several transcript variants encoding a few different isoforms have been found for this gene. [provided by RefSeq, Feb 2011]
Protein Families	Transmembrane
