RRAGA (NM_006570) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human Ras-related GTP binding A (RRAGA), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC203493 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

IPSAATLINIRNARKHFEKLERVDGPKHSLLMR

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 36.4 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional

chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: <u>NP 006561</u>

Locus ID: 10670

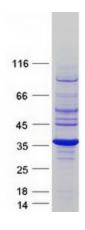

UniProt ID: Q7L523 1657 RefSeq Size: Cytogenetics: 9p22.1 RefSeq ORF: 939

Synonyms: FIP-1; FIP1; RAGA

Summary: Guanine nucleotide-binding protein that plays a crucial role in the cellular response to amino

> acid availability through regulation of the mTORC1 signaling cascade. Forms heterodimeric Rag complexes with RRAGC or RRAGD and cycles between an inactive GDP-bound and an active GTP-bound form. In its active form participates in the relocalization of mTORC1 to the lysosomes and its subsequent activation by the GTPase RHEB. Involved in the RCC1/Ran-GTPase pathway. May play a direct role in a TNF-alpha signaling pathway leading to induction of cell death. May alternatively act as a cellular target for adenovirus E3-14.7K, an inhibitor of TNF-alpha functions, thereby affecting cell death.[UniProtKB/Swiss-Prot Function]

Product images:

Coomassie blue staining of purified RRAGA protein (Cat# [TP303493]). The protein was produced from HEK293T cells transfected with RRAGA cDNA clone (Cat# [RC203493]) using MegaTran 2.0 (Cat# [TT210002]).
