	THRSP (NM_003251) Human Recombinant Protein – TP304567L
RefSeq Size:	1182
Cytogenetics:	11q14.1
RefSeq ORF:	438
Synonyms:	Lpgp; LPGP1; S14; SPOT14; THRP
Summary:	The protein encoded by this gene is similar to the gene product of S14, a rat gene whose expression is limited to liver and adipose tissue and is controlled by nutritional and hormonal factors. This gene has been shown to be expressed in liver and adipocytes, particularly in lipomatous modules. It is also found to be expressed in lipogenic breast cancers, which suggests a role in controlling tumor lipid metabolism. [provided by RefSeq, Jul 2008]
