HEPC (HAMP) (NM_021175) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human hepcidin antimicrobial peptide (HAMP), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC204620 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

MALSSQIWAACLLLLLLASLTSGSVFPQQTGQLAELQPQDRAGARASWMPMFQRRRRRDTHFPICIFCC

GCCHRSKCGMCCKT

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 6.9 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 066998

 Locus ID:
 57817

 UniProt ID:
 P81172

 RefSeq Size:
 430

Cytogenetics: 19q13.12

HEPC (HAMP) (NM_021175) Human Recombinant Protein - TP304620M

RefSeq ORF: 252

Synonyms: HEPC; HFE2B; LEAP1; PLTR

Summary: The product encoded by this gene is involved in the maintenance of iron homeostasis, and it is

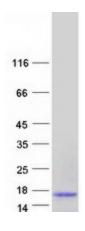

necessary for the regulation of iron storage in macrophages, and for intestinal iron

absorption. The preproprotein is post-translationally cleaved into mature peptides of 20, 22 and 25 amino acids, and these active peptides are rich in cysteines, which form intramolecular bonds that stabilize their beta-sheet structures. These peptides exhibit antimicrobial activity against bacteria and fungi. Mutations in this gene cause hemochromatosis type 2B, also known as juvenile hemochromatosis, a disease caused by severe iron overload that results in

cardiomyopathy, cirrhosis, and endocrine failure. [provided by RefSeq, Oct 2014]

Protein Families: Secreted Protein, Transmembrane

Product images:

Coomassie blue staining of purified HAMP protein (Cat# [TP304620]). The protein was produced from HEK293T cells transfected with HAMP cDNA clone (Cat# [RC204620]) using MegaTran 2.0 (Cat# [TT210002]).
