Product datasheet for TP304693L

Aquaporin 4 (AQP4) (NM_001650) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Purified recombinant protein of Human aquaporin 4 (AQP4), transcript variant a, full-length, with C-terminal Myc-DDK tag, expressed in HEK293T cells, 1mg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC204693 representing NM_001650 Red=Cloning site Green=Tags(s)

	Aquaporin 4 (AQP4) (NM_001650) Human Recombinant Protein – TP304693L
RefSeq ORF:	969
Synonyms:	MIWC; WCH4
Summary:	This gene encodes a member of the aquaporin family of intrinsic membrane proteins that function as water-selective channels in the plasma membranes of many cells. This protein is the predominant aquaporin found in brain and has an important role in brain water homeostasis. Alternatively spliced transcript variants encoding different isoforms have been described for this gene. Additional isoforms, resulting from the use of alternative in-frame translation initiation codons, have also been described. Recent studies provided evidence for translational readthrough in this gene, and expression of C-terminally extended isoforms via the use of an alternative in-frame translation termination codon.
