

## Product datasheet for TP305692L

### Alkaline Phosphatase (ALPL) (NM\_000478) Human Recombinant Protein

#### Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human alkaline phosphatase, liver/bone/kidney (ALPL), transcript variant 1, 1 mg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC205692 protein sequence <b>Red</b> =Cloning site <b>Green</b> =Tags(s)

Tag:	C-Myc/DDK
Predicted MW:	55.5 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol
Preparation:	Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.

<b>Stability:</b>	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
<b>RefSeq:</b>	<a href="#">NP_000469</a>
<b>Locus ID:</b>	249
<b>UniProt ID:</b>	<a href="#">P05186</a> , <a href="#">A0A024RAB4</a>
<b>RefSeq Size:</b>	2606
<b>Cytogenetics:</b>	1p36.12
<b>RefSeq ORF:</b>	1572
<b>Synonyms:</b>	AP-TNAP; APTNAP; HOPS; HPPA; HPPC; HPPI; HPPO; TNALP; TNAP; TNSALP
<b>Summary:</b>	This gene encodes a member of the alkaline phosphatase family of proteins. There are at least four distinct but related alkaline phosphatases: intestinal, placental, placental-like, and liver/bone/kidney (tissue non-specific). The first three are located together on chromosome 2, while the tissue non-specific form is located on chromosome 1. The product of this gene is a membrane bound glycosylated enzyme that is not expressed in any particular tissue and is, therefore, referred to as the tissue-nonspecific form of the enzyme. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate the mature enzyme. This enzyme may play a role in bone mineralization. Mutations in this gene have been linked to hypophosphatasia, a disorder that is characterized by hypercalcemia and skeletal defects. [provided by RefSeq, Oct 2015]
<b>Protein Families:</b>	Druggable Genome
<b>Protein Pathways:</b>	Folate biosynthesis, Metabolic pathways

### Product images:

Coomassie blue staining of purified ALPL protein (Cat# [TP305692]). The protein was produced from HEK293T cells transfected with ALPL cDNA clone (Cat# [RC205692]) using MegaTran 2.0 (Cat# [TT210002]).
