KCTD17 (NM_024681) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human potassium channel tetramerisation domain containing 17

(KCTD17), 20 µg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone or AA Sequence:

>RC206070 protein sequence Red=Cloning site Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 33.1 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 078957

RefSeq ORF:

KCTD17 (NM_024681) Human Recombinant Protein - TP306070

Locus ID: 79734

UniProt ID: Q8N5Z5

RefSeq Size: 1707

Cytogenetics: 22q12.3

Summary: This gene encodes a protein that belongs to a conserved family of potassium channel

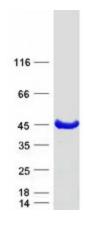

> tetramerization domain (KCTD)-containing proteins. The encoded protein functions in ciliogenesis by acting as a substrate adaptor for the cullin3-based ubiquitin-conjugating enzyme E3 ligase, and targets trichoplein, a keratin-binding protein, for degradation via polyubiquitinylation. A mutation in this gene is associated with autosomal dominant

myoclonic dystonia 26. [provided by RefSeq, Nov 2016]

Product images:

Coomassie blue staining of purified KCTD17 protein (Cat# TP306070). The protein was produced from HEK293T cells transfected with KCTD17 cDNA clone (Cat# [RC206070]) using

MegaTran 2.0 (Cat# [TT210002]).
