REG1 beta (REG1B) (NM_006507) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human regenerating islet-derived 1 beta (REG1B), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC206451 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

TSCSGFKKWKDESCEKKFSFVCKFKN

TRTRPLEQKLISEEDLAANDILDYKDDDDK**V**

Tag: C-Myc/DDK

Predicted MW: 16.2 kDa

Concentration: $>0.05 \mu g/\mu L$ as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 006498

Locus ID: 5968

UniProt ID: <u>P48304</u>, <u>Q6ICS1</u>

RefSeq Size: 812

Cytogenetics: 2p12

RefSeq ORF: 498

Synonyms: PSPS2; REGH; REGI-BETA; REGL

Summary: This gene is a type I subclass member of the Reg gene family. The Reg gene family is a

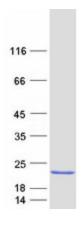

multigene family grouped into four subclasses, types I, II, III and IV based on the primary structures of the encoded proteins. This gene encodes a protein secreted by the exocrine pancreas that is highly similar to the REG1A protein. The related REG1A protein is associated

with islet cell regeneration and diabetogenesis, and may be involved in pancreatic

lithogenesis. Reg family members REG1A, REGL, PAP and this gene are tandemly clustered on chromosome 2p12 and may have arisen from the same ancestral gene by gene duplication.

[provided by RefSeq, Jul 2008]

Product images:

Coomassie blue staining of purified REG1B protein (Cat# [TP306451]). The protein was produced from HEK293T cells transfected with REG1B cDNA clone (Cat# [RC206451]) using MegaTran 2.0 (Cat# [TT210002]).
