# Product datasheet for TP306755L

#### Parvin gamma (PARVG) (NM\_022141) Human Recombinant Protein

### **Product data:**

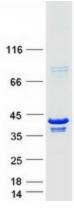

| Product Type:                            | Recombinant Proteins                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description:                             | Recombinant protein of human parvin, gamma (PARVG), transcript variant 1, 1 mg                                                                                                                                                                                                                                                                              |
| Species:                                 | Human                                                                                                                                                                                                                                                                                                                                                       |
| Expression Host:                         | HEK293T                                                                                                                                                                                                                                                                                                                                                     |

| Tag:                                     | C-Myc/DDK                                                                                                                                                                                                                                                                                                                                                   |
| Predicted MW:                            | 37.3 kDa                                                                                                                                                                                                                                                                                                                                                    |
| Concentration:                           | >0.05 µg/µL as determined by microplate BCA method                                                                                                                                                                                                                                                                                                          |
| Purity:                                  | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                                                                                                                                                                                                                 |
| Buffer:                                  | 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol                                                                                                                                                                                                                                                                                                        |
| Preparation:                             | Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.                                                                                                                                                                                                                                            |
| Note:                                    | For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.                                                                                                                                                                                                        |
| Storage:                                 | Store at -80°C.                                                                                                                                                                                                                                                                                                                                             |
| Stability:                               | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.                                                                                                                                                                                                               |
| RefSeq:                                  | <u>NP 071424</u>                                                                                                                                                                                                                                                                                                                                            |
| Locus ID:                                | 64098                                                                                                                                                                                                                                                                                                                                                       |
|                                          |                                                                                                                                                                                                                                                                                                                                                             |

| Summary:        | Members of the parvin family, including PARVG, are actin-binding proteins associated with focal contacts.[supplied by OMIM, Aug 2004]                                                                                                                                                                                                      |
| Protein Pathway | Adherens junction, Arrhythmogenic right ventricular cardiomyopathy (ARVC), Dilated<br>cardiomyopathy, Focal adhesion, Hypertrophic cardiomyopathy (HCM), Leukocyte<br>transendothelial migration, Pathogenic Escherichia coli infection, Regulation of actin<br>cytoskeleton, Tight junction, Vibrio cholerae infection, Viral myocarditis |

## **Product images:**

Coomassie blue staining of purified PARVG protein (Cat# [TP306755]). The protein was produced from HEK293T cells transfected with PARVG cDNA clone (Cat# [RC206755]) using MegaTran 2.0 (Cat# [TT210002]).
