RPL14 (NM 001034996) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human ribosomal protein L14 (RPL14), transcript variant 1, 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC206766 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

KASGKKA

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 23.3 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional

chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeg: NP 001030168

Locus ID: 9045 **UniProt ID:** P50914

RefSeq Size: 939

Cytogenetics: 3p22.1 RefSeq ORF: 651

Synonyms: CAG-ISL-7; CTG-B33; hRL14; L14; RL14

Summary: Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a

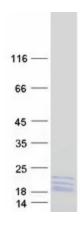

large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L14E family of ribosomal proteins. It contains a basic region-leucine zipper (bZIP)-like domain. The protein is located in the cytoplasm. This gene contains a trinucleotide (GCT) repeat tract whose length is highly polymorphic; these triplet repeats result in a stretch of alanine residues in the encoded protein. Transcript variants utilizing alternative polyA signals and alternative 5'-terminal exons exist but all encode

the same protein. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. [provided by RefSeq, Jul

2008]

Protein Pathways: Ribosome

Product images:

Coomassie blue staining of purified RPL14 protein (Cat# [TP306766]). The protein was produced from HEK293T cells transfected with RPL14 cDNA clone (Cat# [RC206766]) using MegaTran 2.0 (Cat# [TT210002]).
