BATF (NM_006399) Human Recombinant Protein - TP307104L

RefSeq ORF: 375

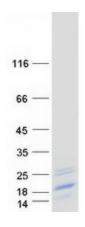

Synonyms: B-ATF; BATF1; SFA-2; SFA2

Summary: The protein encoded by this gene is a nuclear basic leucine zipper protein that belongs to the

AP-1/ATF superfamily of transcription factors. The leucine zipper of this protein mediates dimerization with members of the Jun family of proteins. This protein is thought to be a negative regulator of AP-1/ATF transcriptional events. [provided by RefSeq, Jul 2008]
