

Product datasheet for TP307133L

Myotrophin (MTPN) (NM_145808) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Recombinant protein of human myotrophin (MTPN), 1 mg **Description:** Species: Human HEK293T **Expression Host: Expression cDNA Clone** >RC207133 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s) MCDKEFMWALKNGDLDEVKDYVAKGEDVNRTLEGGRKPLHYAADCGQLEILEFLLLKGADINAPDKHHI Т PLLSAVYEGHVSCVKLLLSKGADKTVKGPDGLTAFEATDNQAIKALLQ **SGPTRTRPL**EQKLISEEDLAANDILDYKDDDDKV C-Myc/DDK Tag: Predicted MW: 12.7 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol **Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Storage: Store at -80°C. Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 665807 Locus ID: 136319 **UniProt ID:** P58546 3900 **RefSeq Size:**

	Myotrophin (MTPN) (NM_145808) Human Recombinant Protein – TP307133L
Cytogenetics:	7q33
RefSeq ORF:	354
Synonyms:	GCDP; V-1
Summary:	The transcript produced from this gene is bi-cistronic and can encode both myotrophin and leucine zipper protein 6. The myotrophin protein is associated with cardiac hypertrophy, where it is involved in the conversion of NFkappa B p50-p65 heterodimers to p50-p50 and p65-p65 homodimers. This protein also has a potential function in cerebellar morphogenesis, and it may be involved in the differentiation of cerebellar neurons, particularly of granule cells. A cryptic ORF at the 3' end of this transcript uses a novel internal ribosome entry site and a non-AUG translation initiation codon to produce leucine zipper protein 6, a 6.4 kDa tumor antigen that is associated with myeloproliferative disease. [provided by RefSeq, Jul 2008]

Product images:

Coomassie blue staining of purified MTPN protein (Cat# [TP307133]). The protein was produced from HEK293T cells transfected with MTPN cDNA clone (Cat# [RC207133]) using MegaTran 2.0 (Cat# [TT210002]).
