PRELP (NM 201348) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Purified recombinant protein of Homo sapiens proline/arginine-rich end leucine-rich repeat Description:

protein (PRELP), transcript variant 2, 100 µg

Species: Human **Expression Host:** HEK293T

Expression cDNA Clone >RC207609 protein sequence or AA Sequence:

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

C-Myc/DDK Tag: Predicted MW: 41.6 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Recombinant protein was captured through anti-DDK affinity column followed by **Preparation:**

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Store at -80°C. Storage:

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

NP 958505 RefSeq:

PRELP (NM_201348) Human Recombinant Protein - TP307609M

Locus ID: 5549

UniProt ID:P51888RefSeq Size:5823Cytogenetics:1q32.1RefSeq ORF:1146

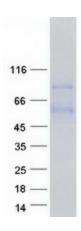

Synonyms: MST161; MSTP161; SLRR2A

Summary: The protein encoded by this gene is a leucine-rich repeat protein present in connective tissue

extracellular matrix. This protein functions as a molecule anchoring basement membranes to the underlying connective tissue. This protein has been shown to bind type I collagen to basement membranes and type II collagen to cartilage. It also binds the basement membrane heparan sulfate proteoglycan perlecan. This protein is suggested to be involved in the pathogenesis of Hutchinson-Gilford progeria (HGP), which is reported to lack the binding of collagen in basement membranes and cartilage. Alternatively spliced transcript variants encoding the same protein have been observed. [provided by RefSeq, Jul 2008]

Protein Families: Secreted Protein

Product images:

Coomassie blue staining of purified PRELP protein (Cat# [TP307609]). The protein was produced from HEK293T cells transfected with PRELP cDNA clone (Cat# [RC207609]) using MegaTran 2.0 (Cat# [TT210002]).
