## Intrinsic Factor (GIF) (NM\_005142) Human Recombinant Protein

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant protein of human gastric intrinsic factor (vitamin B synthesis) (GIF), 100 μg

Species: Human
Expression Host: HEK293T

**Expression cDNA Clone** >RC207777 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

**TRTRPL**EQKLISEEDLAANDILDYKDDDDK**V** 

Tag: C-Myc/DDK

**Predicted MW:** 43.4 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

**Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

**Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

**Note:** For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

**Storage:** Store at -80°C.

**Stability:** Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 005133

**Locus ID:** 2694

UniProt ID: P27352

RefSeq Size: 1536 Cytogenetics: 11q12.1 RefSeq ORF: 1251

**Synonyms:** GIF; IF; IFMH; INF; TCN3

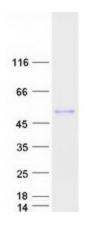

**Summary:** This gene is a member of the cobalamin transport protein family. It encodes a glycoprotein

secreted by parietal cells of the gastric mucosa and is required for adequate absorption of vitamin B12. Vitamin B12 is necessary for erythrocyte maturation and mutations in this gene

may lead to congenital pernicious anemia. [provided by RefSeq, Jul 2008]

**Protein Families:** Secreted Protein

## **Product images:**

Coomassie blue staining of purified CBLIF protein (Cat# [TP307777]). The protein was produced from HEK293T cells transfected with CBLIF cDNA clone (Cat# [RC207777]) using MegaTran 2.0 (Cat# [TT210002]).
