BLCAP (NM_006698) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human bladder cancer associated protein (BLCAP), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC208259 representing NM_006698

or AA Sequence: Red=Cloning site Green=Tags(s)

MYCLQWLLPVLLIPKPLNPALWFSHSMFMGFYLLSFLLERKPCTICALVFLAALFLICYSCWGNCFLYHC

SDSPLPESAHDPGVVGT

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 9.7 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 006689

 Locus ID:
 10904

 UniProt ID:
 P62952

 RefSeq Size:
 2057

Cytogenetics: 20q11.23

RefSeq ORF: 261

Synonyms: BC10

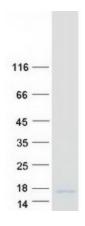

Summary: This gene encodes a protein that reduces cell growth by stimulating apoptosis. Alternative

splicing and the use of alternative promoters result in multiple transcript variants encoding the same protein. This gene is imprinted in brain where different transcript variants are expressed from each parental allele. Transcript variants initiating from the upstream promoter are expressed preferentially from the maternal allele, while transcript variants initiating downstream of the interspersed NNAT gene (GeneID:4826) are expressed from the paternal allele. Transcripts at this locus may also undergo A to I editing, resulting in amino acid changes at three positions in the N-terminus of the protein. [provided by RefSeq, Nov

2015]

Protein Families: Transmembrane

Product images:

Coomassie blue staining of purified BLCAP protein (Cat# [TP308259]). The protein was produced from HEK293T cells transfected with BLCAP cDNA clone (Cat# [RC208259]) using MegaTran 2.0 (Cat# [TT210002]).
