

# Product datasheet for TP308263L

## PLCD1 (NM\_006225) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins Description:** Recombinant protein of human phospholipase C, delta 1 (PLCD1), transcript variant 2, 1 mg Species: Human HEK293T **Expression Host: Expression cDNA Clone** Recombinant protein was produced with TrueORF clone, RC208263. or AA Sequence: C-Myc/DDK Tag: Predicted MW: 85.5 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol Recombinant protein was captured through anti-DDK affinity column followed by **Preparation:** conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Store at -80°C. Storage: Stable for 12 months from the date of receipt of the product under proper storage and Stability: handling conditions. Avoid repeated freeze-thaw cycles. RefSeq: NP 006216 Locus ID: 5333 UniProt ID: P51178, A0A384MR47, A8K8F9 **RefSeq Size:** 2683 Cytogenetics: 3p22.2 **RefSeq ORF:** 2268 NDNC3; PLC-III Synonyms:

	PLCD1 (NM_006225) Human Recombinant Protein – TP308263L
Summary:	This gene encodes a member of the phospholipase C family. Phospholipase C isozymes play critical roles in intracellular signal transduction by catalyzing the hydrolysis of phosphatidylinositol 4,5-bisphosphate (PIP2) into the second messengers diacylglycerol (DAG) and inositol triphosphate (IP3). The encoded protein functions as a tumor suppressor in several types of cancer, and mutations in this gene are a cause of hereditary leukonychia. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Dec 2011]
Protein Families	: Druggable Genome
Protein Pathway	s: Calcium signaling pathway, Inositol phosphate metabolism, Metabolic pathways, Phosphatidylinositol signaling system

### **Product images:**

Coomassie blue staining of purified PLCD1 protein (Cat# [TP308263]). The protein was produced from HEK293T cells transfected with PLCD1 cDNA clone (Cat# [RC208263]) using MegaTran 2.0 (Cat# [TT210002]).
