**Summary:** This gene encodes an enzyme which removes 9-O-acetylation modifications from sialic acids. Mutations in this gene are associated with susceptibility to autoimmune disease 6. Multiple transcript variants encoding different isoforms, found either in the cytosol or in the lysosome, have been found for this gene.[provided by RefSeq, Feb 2011]

### Product images:

Coomassie blue staining of purified SIAE protein (Cat# [TP309708]). The protein was produced from HEK293T cells transfected with SIAE cDNA clone (Cat# [RC209708]) using MegaTran 2.0 (Cat# [TT210002]).
