CRBN (NM_016302) Human Recombinant Protein - TP309794L

UniProt ID: Q96SW2

RefSeq Size: 2596 Cytogenetics: 3p26.2 RefSeq ORF: 1326

Synonyms: MRT2; MRT2A

Summary: This gene encodes a protein related to the Lon protease protein family. In rodents and other

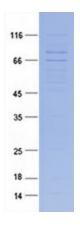

mammals this gene product is found in the cytoplasm localized with a calcium channel

membrane protein, and is thought to play a role in brain development. Mutations in this gene are associated with autosomal recessive nonsyndromic cognitive disability. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Mar
