

Product datasheet for **TP310851M**

PACAP (ADCYAP1) (NM_001117) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human adenylate cyclase activating polypeptide 1 (pituitary) (ADCYAP1), transcript variant 2, 100 µg

Species: Human

Expression Host: HEK293T

Expression cDNA Clone or AA Sequence: >RC210851 protein sequence
Red=Cloning site **Green**=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 4.5 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: [NP_001108](#)

Locus ID: 116

UniProt ID: [P18509](#)

[View online »](#)

RefSeq Size: 3259

Cytogenetics: 18p11.32

RefSeq ORF: 528

Synonyms: PACAP

Summary: This gene encodes a secreted proprotein that is further processed into multiple mature peptides. These peptides stimulate adenylate cyclase and increase cyclic adenosine monophosphate (cAMP) levels, resulting in the transcriptional activation of target genes. The products of this gene are key mediators of neuroendocrine stress responses. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2013]

Protein Families: Secreted Protein

Product images:

Coomassie blue staining of purified ADCYAP1 protein (Cat# [TP310851]). The protein was produced from HEK293T cells transfected with ADCYAP1 cDNA clone (Cat# [RC210851]) using MegaTran 2.0 (Cat# [TT210002]).
