GM CSF (CSF2) (NM_000758) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human colony stimulating factor 2 (granulocyte-macrophage) (CSF2),

1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone or AA Sequence:

>RC211109 protein sequence Red=Cloning site Green=Tags(s)

PVQE

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 14.4 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 000749

Locus ID: 1437

UniProt ID: P04141

RefSeq Size: 800

Cytogenetics: 5q31.1 RefSeq ORF: 432

Synonyms: CSF; GMCSF

Summary: The protein encoded by this gene is a cytokine that controls the production, differentiation,

and function of granulocytes and macrophages. The active form of the protein is found extracellularly as a homodimer. This gene has been localized to a cluster of related genes at chromosome region 5q31, which is known to be associated with interstitial deletions in the 5q- syndrome and acute myelogenous leukemia. Other genes in the cluster include those encoding interleukins 4, 5, and 13. This gene plays a role in promoting tissue inflammation. Elevated levels of cytokines, including the one produced by this gene, have been detected in SARS-CoV-2 infected patients that develop acute respiratory distress syndrome. Mice deficient in this gene or its receptor develop pulmonary alveolar proteinosis. [provided by RefSeq, Aug

2020]

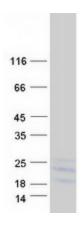

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein

Protein Pathways: Cytokine-cytokine receptor interaction, Fc epsilon RI signaling pathway, Hematopoietic cell

lineage, Jak-STAT signaling pathway, Natural killer cell mediated cytotoxicity, T cell receptor

signaling pathway

Product images:

Coomassie blue staining of purified CSF2 protein (Cat# [TP311109]). The protein was produced from HEK293T cells transfected with CSF2 cDNA clone (Cat# [RC211109]) using MegaTran 2.0 (Cat# [TT210002]).
