## Retinal protein 4 (UNC119) (NM\_054035) Human Recombinant Protein

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Purified recombinant protein of Homo sapiens unc-119 homolog (C. elegans) (UNC119),

transcript variant 2, 100 µg

Species: Human
Expression Host: HEK293T

**Expression cDNA Clone** >RC212513 representing NM\_054035 or AA Sequence: Red=Cloning site Green=Tags(s)

GSGEVGASRD

**TRTRPL**EQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

**Predicted MW:** 23.9 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

**Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

**Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

**Note:** For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

**RefSeq:** NP 473376

**Locus ID:** 9094

#### Retinal protein 4 (UNC119) (NM\_054035) Human Recombinant Protein - TP312513M

UniProt ID: Q13432
RefSeq Size: 1667
Cytogenetics: 17q11.2
RefSeq ORF: 660

Synonyms: HRG4; IMD13; POC7; POC7A

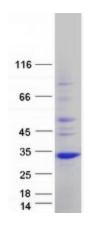

**Summary:** This gene is specifically expressed in the photoreceptors in the retina. The encoded product

shares strong homology with the C. elegans unc119 protein and it can functionally complement the C. elegans unc119 mutation. It has been localized to the photoreceptor synapses in the outer plexiform layer of the retina, and suggested to play a role in the mechanism of photoreceptor neurotransmitter release through the synaptic vesicle cycle. Two transcript variants encoding different isoforms have been described for this gene. [provided

by RefSeq, Jul 2008]

**Protein Families:** Druggable Genome, Stem cell - Pluripotency

## **Product images:**

Coomassie blue staining of purified UNC119 protein (Cat# [TP312513]). The protein was produced from HEK293T cells transfected with UNC119 cDNA clone (Cat# [RC212513]) using MegaTran 2.0 (Cat# [TT210002]).
