Summary:	This gene encodes a member of the acyl-Coenzyme A binding protein family, known to functi the transport and distribution of long chain acyl-Coenzyme A in cells. This gene may play a ro the differentiation of megakaryocytes and formation of platelets. A related protein in yeast is involved in autophagy of peroxisomes. A mutation in this gene has been associated with autosomal dominant thrombocytopenia. Alternative splicing results in multiple transcript var [provided by RefSeq, Jul 2014]
