# Product datasheet for TP313549M

#### Dystrobrevin alpha (DTNA) (NM\_032980) Human Recombinant Protein

### **Product data:**

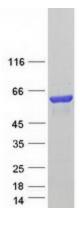

| Product Type:                            | Recombinant Proteins  |
|--|---|
| Description:                             | Recombinant protein of human dystrobrevin, alpha (DTNA), transcript variant 6, 100 $\mu g$  |
| Species:                                 | Human   |
| Expression Host:                         | HEK293T   |
| Expression cDNA Clone<br>or AA Sequence: | >RC213549 representing NM_032980<br>Red=Cloning site Green=Tags(s)  |

|  | TRTRPLEQKLISEEDLAANDILDYKDDDDKV   |
| Tag:                                     | C-Myc/DDK   |
| Predicted MW:                            | 43.4 kDa  |
| Concentration:                           | >0.05 µg/µL as determined by microplate BCA method  |
| Purity:                                  | > 80% as determined by SDS-PAGE and Coomassie blue staining   |
| Buffer:                                  | 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol  |
| Preparation:                             | Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.  |
| Note:                                    | For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.  |
| Storage:                                 | Store at -80°C.   |
| Stability:                               | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.   |
| RefSeq:                                  | <u>NP 116762</u>  |
| Locus ID:                                | 1837  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|                  | Dystrobrevin alpha (DTNA) (NM_032980) Human Recombinant Protein – TP313549M  |
|------------------|--|
| UniProt ID:      | <u>Q9Y4J8</u>  |
| RefSeq Size:     | 5221   |
| Cytogenetics:    | 18q12.1  |
| RefSeq ORF:      | 1173   |
| Synonyms:        | D18S892E; DRP3; DTN; DTN-A; LVNC1  |
| Summary:         | The protein encoded by this gene belongs to the dystrobrevin subfamily of the dystrophin<br>family. This protein is a component of the dystrophin-associated protein complex (DPC),<br>which consists of dystrophin and several integral and peripheral membrane proteins,<br>including dystroglycans, sarcoglycans, syntrophins and alpha- and beta-dystrobrevin. The DPC<br>localizes to the sarcolemma and its disruption is associated with various forms of muscular<br>dystrophy. Mutations in this gene are associated with left ventricular noncompaction with<br>congenital heart defects. Multiple alternatively spliced transcript variants encoding different<br>isoforms have been identified for this gene. [provided by RefSeq, Jul 2008] |

## **Product images:**

Coomassie blue staining of purified DTNA protein (Cat# [TP313549]). The protein was produced from HEK293T cells transfected with DTNA cDNA clone (Cat# [RC213549]) using MegaTran 2.0 (Cat# [TT210002]).
