	CAPS (NM_080590) Human Recombinant Protein – TP315422
Cytogenetics:	19p13.3
RefSeq ORF:	486
Synonyms:	CAPS1
Summary:	This gene encodes a calcium-binding protein, which may play a role in the regulation of ion transport. A similar protein was first described as a potentially important regulatory protein in the dog thyroid and was termed as R2D5 antigen in rabbit. Alternative splicing of this gene generates two transcript variants. [provided by RefSeq, Jul 2008]
