

Product datasheet for **TP317248L**

MAL (NM_022438) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human mal, T-cell differentiation protein (MAL), transcript variant b, 1 mg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC217248 representing NM_022438 Red =Cloning site Green =Tags(s)

MAPAAATGGSTLPSGFSVFTLLPDLLFIFEFIFGGLVWILVASSLVPWPLVQGWVMFVSVFCVATTTLI
ILYIIGAHHGETSWVTLVFSYIATLLYVVHAVFSLIRWKSS

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag:	C-Myc/DDK
Predicted MW:	11.9 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol
Preparation:	Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<u>NP_071883</u>
Locus ID:	4118
UniProt ID:	<u>P21145</u>
RefSeq Size:	930

Cytogenetics: 2q11.1

RefSeq ORF: 333

Synonyms: MVP17; VIP17

Summary: The protein encoded by this gene is a highly hydrophobic integral membrane protein belonging to the MAL family of proteolipids. The protein has been localized to the endoplasmic reticulum of T-cells and is a candidate linker protein in T-cell signal transduction. In addition, this proteolipid is localized in compact myelin of cells in the nervous system and has been implicated in myelin biogenesis and/or function. The protein plays a role in the formation, stabilization and maintenance of glycosphingolipid-enriched membrane microdomains. Down-regulation of this gene has been associated with a variety of human epithelial malignancies. Alternative splicing produces four transcript variants which vary from each other by the presence or absence of alternatively spliced exons 2 and 3. [provided by RefSeq, May 2012]

Protein Families: Transmembrane

Product images:

Coomassie blue staining of purified MAL protein (Cat# [TP317248]). The protein was produced from HEK293T cells transfected with MAL cDNA clone (Cat# [RC217248]) using MegaTran 2.0 (Cat# [TT210002]).
