CBLN3 (NM_001039771) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human cerebellin 3 precursor (CBLN3), 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC217397 representing NM_001039771

or AA Sequence: Red=Cloning site Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 21.3 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeg: NP 001034860

Locus ID: 643866 **UniProt ID:** Q6UW01

CBLN3 (NM_001039771) Human Recombinant Protein - TP317397L

RefSeq Size: 2340

Cytogenetics: 14q12 RefSeq ORF: 615

Synonyms: PRO1486

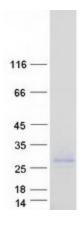

Summary: Members of the precerebellin family, such as CBLN3, contain a cerebellin motif (see CBLN1;

MIM 600432) and a C-terminal C1q signature domain (see MIM 120550) that mediates trimeric assembly of atypical collagen complexes. However, precerebellins do not contain a collagen motif, suggesting that they are not conventional components of the extracellular

matrix (Pang et al., 2000 [PubMed 10964938]).[supplied by OMIM, Aug 2009]

Protein Families: Secreted Protein

Product images:

Coomassie blue staining of purified CBLN3 protein (Cat# [TP317397]). The protein was produced from HEK293T cells transfected with CBLN3 cDNA clone (Cat# [RC217397]) using MegaTran 2.0 (Cat# [TT210002]).
