CABP (CABP1) (NM_031205) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human calcium binding protein 1 (CABP1), transcript variant 1, 100

με

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC218317 representing NM_031205 or AA Sequence: Red=Cloning site Green=Tags(s)

Tag: C-Myc/DDK
Predicted MW: 25.8 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 112482

Locus ID: 9478

UniProt ID: Q9NZU7

RefSeg Size: 1201

Cytogenetics: 12q24.31

RefSeq ORF: 681

Synonyms: CALBRAIN; HCALB BR

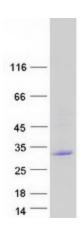

Summary: Calcium binding proteins are an important component of calcium mediated cellular signal

> transduction. This gene encodes a protein that belongs to a subfamily of calcium binding proteins which share similarity to calmodulin. The protein encoded by this gene regulates the gating of voltage-gated calcium ion channels. This protein inhibits calcium-dependent inactivation and supports calcium-dependent facilitation of ion channels containing voltagedependent L-type calcium channel subunit alpha-1C. This protein also regulates calciumdependent activity of inositol 1,4,5-triphosphate receptors, P/Q-type voltage-gated calcium channels, and transient receptor potential channel TRPC5. This gene is predominantly

expressed in retina and brain. Alternative splicing results in multiple transcript variants

encoding disinct isoforms. [provided by RefSeq, Jul 2012]

Product images:

Coomassie blue staining of purified CABP1 protein (Cat# [TP318317]). The protein was produced from HEK293T cells transfected with CABP1 cDNA clone (Cat# [RC218317]) using MegaTran 2.0 (Cat# [TT210002]).
