## C4BPB (NM\_001017367) Human Recombinant Protein

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Purified recombinant protein of Homo sapiens complement component 4 binding protein,

beta (C4BPB), transcript variant 5, 100 μg

Species: Human
Expression Host: HEK293T

**Expression cDNA Clone** >RC219216 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

**TRTRPL**EQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 26.3 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

**Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

**Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

**Note:** For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

**RefSeq:** NP 001017367

Locus ID: 725

C4BP

 UniProt ID:
 P20851

 RefSeq Size:
 967

 Cytogenetics:
 1q32.1

 RefSeq ORF:
 812

**Summary:** This gene encodes a member of a superfamily of proteins composed predominantly of

tandemly arrayed short consensus repeats of approximately 60 amino acids. A single, unique beta-chain encoded by this gene assembles with seven identical alpha-chains into the predominant isoform of C4b-binding protein, a multimeric protein that controls activation of the complement cascade through the classical pathway. C4b-binding protein has a regulatory role in the coagulation system also, mediated through the beta-chain binding of protein S, a vitamin K-dependent protein that serves as a cofactor of activated protein C. The genes

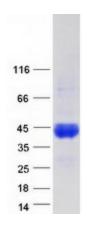

encoding both alpha and beta chains are located adjacent to each other on human chromosome 1 in the regulator of complement activation gene cluster. Alternative splicing

gives rise to multiple transcript variants. [provided by RefSeq, Jul 2008]

**Protein Pathways:** Complement and coagulation cascades

Synonyms:

Coomassie blue staining of purified C4BPB protein (Cat# [TP319216]). The protein was produced from HEK293T cells transfected with C4BPB cDNA clone (Cat# [RC219216]) using MegaTran 2.0 (Cat# [TT210002]).
