

Product datasheet for TP319294M

IL15 (NM_172174) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Recombinant protein of human interleukin 15 (IL15), transcript variant 1, 100 µg **Description:** Species: Human HEK293T **Expression Host:** Expression cDNA Clone >RC219294 representing NM 172174 or AA Sequence: Red=Cloning site Green=Tags(s) MRISKPHLRSISIQCYLCLLLNSHFLTEAGIHVFILGCFSAGLPKTEANWVNVISDLKKIEDLIQSMHID ATLYTESDVHPSCKVTAMKCFLLELQVISLESGDASIHDTVENLIILANNSLSSNGNVTESGCKECEELE **EKNIKEFLQSFVHIVQMFINTS TRTRPLEQKLISEEDLAANDILDYKDDDDKV** C-Myc/DDK Tag: Predicted MW: 14.7 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol **Preparation:** Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Storage: Store at -80°C. Stability: Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 751914 Locus ID: 3600 **UniProt ID:** P40933 1969 **RefSeq Size:**

	IL15 (NM_172174) Human Recombinant Protein – TP319294M
Cytogenetics:	4q31.21
RefSeq ORF:	486
Synonyms:	IL-15; Interleukin 15; MGC9721; OTTHUMP00000164617
Summary:	The protein encoded by this gene is a cytokine that regulates T and natural killer cell activation and proliferation. This cytokine and interleukine 2 share many biological activities. They are found to bind common hematopoietin receptor subunits, and may compete for the same receptor, and thus negatively regulate each other's activity. The number of CD8+ memory cells is shown to be controlled by a balance between this cytokine and IL2. This cytokine induces the activation of JAK kinases, as well as the phosphorylation and activation of transcription activators STAT3, STAT5, and STAT6. Studies of the mouse counterpart suggested that this cytokine may increase the expression of apoptosis inhibitor BCL2L1/BCL- x(L), possibly through the transcription activation activity of STAT6, and thus prevent apoptosis. Alternatively spliced transcript variants of this gene have been reported. [provided by RefSeq, Feb 2011]
Protein Families	: Druggable Genome, Secreted Protein
Protein Pathway	vs: Cytokine-cytokine receptor interaction, Jak-STAT signaling pathway

Coomassie blue staining of purified IL15 protein (Cat# [TP319294]). The protein was produced from HEK293T cells transfected with IL15 cDNA clone (Cat# [RC219294]) using MegaTran 2.0 (Cat# [TT210002]).
