IKZF3 (NM 183231) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human IKAROS family zinc finger 3 (Aiolos) (IKZF3), transcript variant 5,

1 mg

Species: Human Expression Host: HEK293T

Expression cDNA Clone >RC219750 representing NM_183231 or AA Sequence: Red=Cloning site Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK
Predicted MW: 46.8 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional

chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 899054

Locus ID: 22806

UniProt ID: Q9UKT9
RefSeq Size: 2152

Cytogenetics: 17q12-q21.1

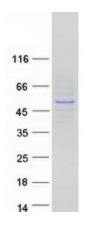

RefSeq ORF: 1242

Synonyms: AIO; AIOLOS; ZNFN1A3

Summary: This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of

this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This gene product is a transcription factor that is important in the regulation of B lymphocyte proliferation and differentiation. Both Ikaros and Aiolos can participate in chromatin remodeling. Regulation of gene expression in B lymphocytes by Aiolos is complex as it appears to require the sequential formation of Ikaros homodimers, Ikaros/Aiolos heterodimers, and Aiolos homodimers. Several alternative transcripts encoding different isoforms have been described, as well as some non-protein coding variants. [provided by RefSeq, Apr 2012]

Product images:

Coomassie blue staining of purified IKZF3 protein (Cat# [TP319750]). The protein was produced from HEK293T cells transfected with IKZF3 cDNA clone (Cat# [RC219750]) using MegaTran 2.0 (Cat# [TT210002]).
