Troponin T1 (TNNT1) (NM_003283) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human troponin T type 1 (skeletal, slow) (TNNT1), transcript variant

1, 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone

>RC221318 representing NM_003283

or AA Sequence:

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 32.8 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 003274

Locus ID: 7138

Troponin T1 (TNNT1) (NM_003283) Human Recombinant Protein - TP321318L

UniProt ID: P13805

RefSeq Size: 980

Cytogenetics: 19q13.42

RefSeq ORF: 834

Synonyms: ANM; NEM5; STNT; TNT; TNTS

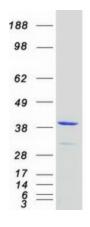

Summary: This gene encodes a protein that is a subunit of troponin, which is a regulatory complex

located on the thin filament of the sarcomere. This complex regulates striated muscle contraction in response to fluctuations in intracellular calcium concentration. This complex is composed of three subunits: troponin C, which binds calcium, troponin T, which binds tropomyosin, and troponin I, which is an inhibitory subunit. This protein is the slow skeletal troponin T subunit. Mutations in this gene cause nemaline myopathy type 5, also known as Amish nemaline myopathy, a neuromuscular disorder characterized by muscle weakness and rod-shaped, or nemaline, inclusions in skeletal muscle fibers which affects infants, resulting in death due to respiratory insufficiency, usually in the second year. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul

2008]

Protein Families: Druggable Genome

Product images:

Coomassie blue staining of purified TNNT1 protein (Cat# [TP321318]). The protein was produced from HEK293T cells transfected with TNNT1 cDNA clone (Cat# [RC221318]) using MegaTran 2.0 (Cat# [TT210002]).
