

# Product datasheet for TP321428L

### NCALD (NM\_001040624) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins** Purified recombinant protein of Homo sapiens neurocalcin delta (NCALD), transcript variant 1, **Description:** 1 mg Species: Human **Expression Host:** HEK293T **Expression cDNA Clone** >RC221428 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s) MGKQNSKLRPEVMQDLLESTDFTEHEIQEWYKGFLRDCPSGHLSMEEFKKIYGNFFPYGDASKFAEHVFR TFDANGDGTIDFREFIIALSVTSRGKLEQKLKWAFSMYDLDGNGYISKAEMLEIVQAIYKMVSSVMKMPE DESTPEKRTEKIFRQMDTNRDGKLSMEEFIRGAKSDPSIVRLLQCDPSSAGQF **TRTRPLEQKLISEEDLAANDILDYKDDDDKV** Tag: C-Myc/DDK Predicted MW: 22.1 kDa **Concentration:** >0.05 µg/µL as determined by microplate BCA method > 80% as determined by SDS-PAGE and Coomassie blue staining Purity: **Buffer:** 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol Recombinant protein was captured through anti-DDK affinity column followed by **Preparation:** conventional chromatography steps. Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Store at -80°C. Storage: Stable for 12 months from the date of receipt of the product under proper storage and Stability: handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 001035714 Locus ID: 83988 **UniProt ID:** P61601, B2RB70

	NCALD (NM_001040624) Human Recombinant Protein – TP321428L
RefSeq Size:	3760
Cytogenetics:	8q22.3
RefSeq ORF:	579
Summary:	This gene encodes a member of the neuronal calcium sensor (NCS) family of calcium-binding proteins. The protein contains an N-terminal myristoylation signal and four EF-hand calcium binding loops. The protein is cytosolic at resting calcium levels; however, elevated intracellular calcium levels induce a conformational change that exposes the myristoyl group, resulting in protein association with membranes and partial co-localization with the perinuclear transgolgi network. The protein is thought to be a regulator of G protein-coupled receptor signal transduction. Several alternatively spliced variants of this gene have been determined, all of which encode the same protein; additional variants may exist but their biological validity has not been determined. [provided by RefSeq, Jul 2008]

## **Product images:**

Coomassie blue staining of purified NCALD protein (Cat# [TP321428]). The protein was produced from HEK293T cells transfected with NCALD cDNA clone (Cat# [RC221428]) using MegaTran 2.0 (Cat# [TT210002]).
