plasticity related gene 3 (PLPPR1) (NM_207299) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human plasticity related gene 3 (PRG-3), transcript variant 1, 20 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC222205 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 35.6 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 997182

Locus ID: 54886

plasticity related gene 3 (PLPPR1) (NM_207299) Human Recombinant Protein - TP322205

UniProt ID: <u>Q8TBJ4</u>, <u>A0A024R154</u>

RefSeq Size: 2461 Cytogenetics: 9q31.1 RefSeq ORF: 975

Synonyms: LPPR1; PRG-3

Summary: This gene encodes a member of the plasticity-related gene (PRG) family. Members of the PRG

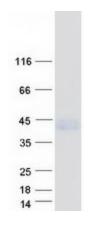

family mediate lipid phosphate phosphatase activity in neurons and are known to be involved in neuronal plasticity. The protein encoded by this gene does not perform its function through

enzymatic phospholipid degradation. This gene is strongly expressed in brain. It shows dynamic expression regulation during brain development and neuronal excitation. Alternatively spliced transcript variants encoding the same protein have been observed.

[provided by RefSeq, Jul 2008]

Protein Families: Phosphatase, Transmembrane

Product images:

Coomassie blue staining of purified PLPPR1 protein (Cat# TP322205). The protein was produced from HEK293T cells transfected with PLPPR1 cDNA clone (Cat# [RC222205]) using MegaTran 2.0 (Cat# [TT210002]).
