	FSH beta (FSHB) (NM_000510) Human Recombinant Protein – TP322666L
Cytogenetics:	11p14.1
RefSeq ORF:	387
Synonyms:	HH24
Summary:	The pituitary glycoprotein hormone family includes follicle-stimulating hormone, luteinizing hormone, chorionic gonadotropin, and thyroid-stimulating hormone. All of these glycoproteins consist of an identical alpha subunit and a hormone-specific beta subunit. This gene encodes the beta subunit of follicle-stimulating hormone. In conjunction with luteinizing hormone, follicle-stimulating hormone induces egg and sperm production. Alternative splicing results in two transcript variants encoding the same protein. [provided by RefSeq, Jul 2008]
Protein Families	Druggable Genome, Secreted Protein
Protein Pathway	s: GnRH signaling pathway, Neuroactive ligand-receptor interaction
