GPR 150 (GPR150) (NM_199243) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human G protein-coupled receptor 150 (GPR150), 100 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC223227 representing NM_199243 or AA Sequence: Red=Cloning site Green=Tags(s)

PRPRPLPCSCESAF

SGPTRTRRLEQKLISEEDLAANDILDYKDDDDK**V**

Tag: C-Myc/DDK
Predicted MW: 46.2 kDa

Concentration: >0.05 μg/μL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by conventional

chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 954713

Locus ID: 285601

UniProt ID: Q8NGU9

RefSeq Size: 1305
Cytogenetics: 5q15
RefSeq ORF: 1302
Synonyms: PGR11

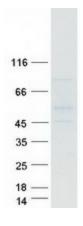

Summary: This gene encodes an orphan member of the class A rhodopsin-like family of G-protein-coupled

receptors (GPCRs). Within the rhodopsin-like family, this gene is a member of the vasopressin-like subfamily that also includes vasopressin and oxytocin receptors. The silencing of this gene, due to promoter methylation, is associated with ovarian cancer progression. All GPCRs have a transmembrane domain that includes seven transmembrane alpha-helices. A general feature of GPCR signaling is the agonist-induced conformational change in the receptor, leading to activation of the heterotrimeric G protein. The activated G protein then binds to and activates numerous downstream effector proteins, which generate second messengers that mediate a

broad range of cellular and physiological processes. [provided by RefSeq, Jul 2017]

Protein Families: Druggable Genome, Transmembrane

Product images:

Coomassie blue staining of purified GPR150 protein (Cat# [TP323227]). The protein was produced from HEK293T cells transfected with GPR150 cDNA clone (Cat# [RC223227]) using MegaTran 2.0 (Cat# [TT210002]).
