AK3L1 (AK4) (NM_001005353) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human adenylate kinase 3-like 1 (AK3L1), nuclear gene encoding

mitochondrial protein, transcript variant 5, 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC224463 protein sequence or AA Sequence: Red=Cloning site Green=Tags(s)

SNKITPIQSKEAY

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 25.1 kDa

Concentration: $>0.05 \mu g/\mu L$ as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 001005353

Locus ID: 205

AK3L1 (AK4) (NM_001005353) Human Recombinant Protein - TP324463L

UniProt ID: P27144

RefSeq Size: 6998

Cytogenetics: 1p31.3

RefSeq ORF: 669

Synonyms: AK3; AK3L1; AK3L2; AK 4

Summary: This gene encodes a member of the adenylate kinase family of enzymes. The encoded protein

is localized to the mitochondrial matrix. Adenylate kinases regulate the adenine and guanine nucleotide compositions within a cell by catalyzing the reversible transfer of phosphate group

among these nucleotides. Five isozymes of adenylate kinase have been identified in

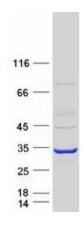

vertebrates. Expression of these isozymes is tissue-specific and developmentally regulated. A pseudogene for this gene has been located on chromosome 17. Three transcript variants encoding the same protein have been identified for this gene. Sequence alignment suggests that the gene defined by NM 013410, NM 203464, and NM 001005353 is located on

chromosome 1. [provided by RefSeq, Jul 2008]

Protein Families: Druggable Genome

Protein Pathways: Metabolic pathways, Purine metabolism

Product images:

Coomassie blue staining of purified AK4 protein (Cat# [TP324463]). The protein was produced from HEK293T cells transfected with AK4 cDNA clone (Cat# [RC224463]) using MegaTran 2.0 (Cat# [TT210002]).
