

## Product datasheet for **TP325431M**

### SPG21 (NM\_001127889) Human Recombinant Protein

#### Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human spastic paraplegia 21 (autosomal recessive, Mast syndrome) (SPG21), transcript variant 2, 100 µg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	>RC225431 protein sequence <b>Red</b> =Cloning site <b>Green</b> =Tags(s)

**TR**TRPLEQKLISEEDLAANDILDYKDDDDKV

Tag:	C-Myc/DDK
Predicted MW:	34.8 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol
Preparation:	Recombinant protein was captured through anti-DDK affinity column followed by conventional chromatography steps.
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<a href="#">NP_001121361</a>
Locus ID:	51324

[View online »](#)

UniProt ID: [Q9NZD8](#), [A0A024R5Y1](#)

RefSeq Size: 1658

Cytogenetics: 15q22.31

RefSeq ORF: 924

Synonyms: ABHD21; ACP33; BM-019; GL010; MAST

**Summary:** The protein encoded by this gene binds to the hydrophobic C-terminal amino acids of CD4 which are involved in repression of T cell activation. The interaction with CD4 is mediated by the noncatalytic alpha/beta hydrolase fold domain of this protein. It is thus proposed that this gene product modulates the stimulatory activity of CD4. Mutations in this gene are associated with autosomal recessive spastic paraplegia 21 (SPG21), also known as mast syndrome. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2014]

### Product images:

Coomassie blue staining of purified SPG21 protein (Cat# [TP325431]). The protein was produced from HEK293T cells transfected with SPG21 cDNA clone (Cat# [RC225431]) using MegaTran 2.0 (Cat# [TT210002]).
