TPM4 (NM 001145160) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Homo sapiens tropomyosin 4 (TPM4), transcript variant 1, 1

mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC227534 representing NM 001145160

or AA Sequence: Red=Cloning site Green=Tags(s)

LNCI

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 32.5 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: Recombinant protein was captured through anti-DDK affinity column followed by

conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeg: NP 001138632

Locus ID: 7171

TPM4 (NM_001145160) Human Recombinant Protein - TP327534L

UniProt ID: <u>P67936</u>, <u>P67936-2</u>

Cytogenetics: 19p13.12-p13.11

RefSeq ORF: 852

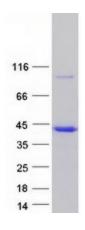

Synonyms: HEL-S-108

Summary: This gene encodes a member of the tropomyosin family of actin-binding proteins involved in

the contractile system of striated and smooth muscles and the cytoskeleton of non-muscle cells. Tropomyosins are dimers of coiled-coil proteins that polymerize end-to-end along the major groove in most actin filaments. They provide stability to the filaments and regulate access of other actin-binding proteins. In muscle cells, they regulate muscle contraction by controlling the binding of myosin heads to the actin filament. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Nov 2009]

Protein Pathways: Cardiac muscle contraction, Dilated cardiomyopathy, Hypertrophic cardiomyopathy (HCM)

Product images:

Coomassie blue staining of purified TPM4 protein (Cat# [TP327534]). The protein was produced from HEK293T cells transfected with TPM4 cDNA clone (Cat# [RC227534]) using MegaTran 2.0 (Cat# [TT210002]).
